

INSTRUCTIONS

LIGHT HANGER PARTS LIST (AASLH48)

- A1 - Vertical Light Bar (2)
- B1 - Trellis Bar (2)
- C1 - Horizontal Light Bar (2)
- D1 - Butterfly Thumb Screw (6)
- E1 - Center Light Bar (1)
- F1 - Lynch Pin (4)

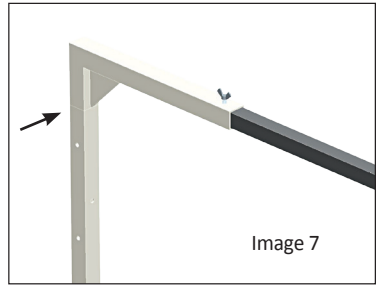

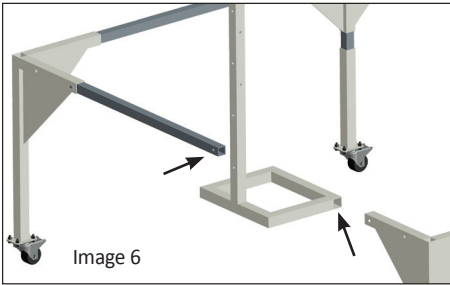

ASSEMBLY INSTRUCTIONS (INCLUDING LIGHT HANGER)

Remove all of the parts from the packaging and set the hardware aside. Check to be sure that the hardware contains the Lynch Pins (quantity: 4) and Butterfly Thumb Screws (quantity: 6).

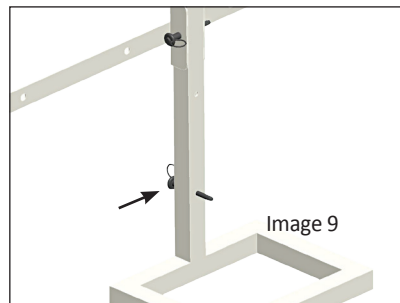

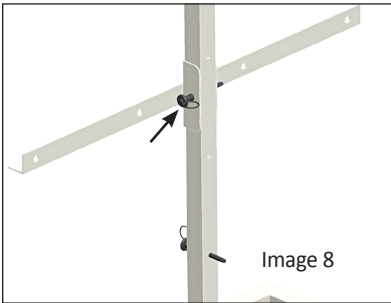

Group all of the stand parts together based on type for ease of locating and assembly, i.e. corner legs together, side rails together, end bars together, etc. All parts will be marked with a letter corresponding to the parts list above.

INSTRUCTIONS

1. Begin by inserting the Side Rails (Part C) into the Corner Legs V1 (Part A) and Corner Legs V2 (Part B), locking them in position with the spring buttons (see Image 1).

2. Install the End Rails (Part D) into the foundation squares of the Vertical Light Bars (Part A1) (see Image 6). Secure each end rail and foundation square together with one of the butterfly thumb screws (Part D1).
3. Attach the Horizontal Light Bars (Part C1) to the Vertical Light Bars (Part A1) (see Image 7).
4. Attach Trellis Bars (Part B1) to the Vertical Light Bars (Part A1) and lock them in place using Lynch Pins (Part F1) (see Image 8).

5. Use the second pair of Lynch Pins (Part F1) to adjust the height of the light hanger by inserting them into the appropriate holes in the Vertical Light Bars (Part A1) (see Image 9).
6. To adjoin the two vertical bar sections, insert the Center Light Bar (Part E1) into the Horizontal Light Bars (Part C1) and secure it using both Butterfly Thumb Screws (Part D1) (see Image 10).
7. Complete the assembly by inserting the Corner Retainers V1 and V2 (Parts F & G), placing them as shown in Image 4 (be sure to place the Corner Retainers V1 at opposite corners to each other and the Corner Retainers V2 at opposite corners to each other as you did with the legs).
